The company's original product was known as "AutoCAD", the "Auto" representing the automation of the design process and "CAD" the development of a specific drawing. Autodesk sold the first computerized drafting program, AutoCAD 1, in 1987. By the mid-1990s, the company had sold over one million AutoCAD units. However, after this initial success, AutoCAD and its subsidiary products suffered a number of setbacks: In 1994, AutoCAD was purchased by Dassault Systemes, a French-based software company. In 1999, Autodesk was purchased by software developer Softimage for $50 million. In 2005, Autodesk filed a lawsuit against former CEO Kevin Curran for defrauding investors and misleading the company into buying Dassault. Curran was convicted of falsifying AutoCAD documents, and of fraud and forgery, and was sentenced to five years in prison. During the time that Autodesk was owned by Dassault, Autodesk developed AutoCAD. In 2009, Autodesk was purchased by the German computer software company, Dassault Systemes, for $4.25 billion. In 2010, Autodesk spun off its digital media creation technology, while retaining control of the AutoCAD and Civil 3D products. The spin-off company is Media and Entertainment.
