## Microsoft Office 2010 Activator - Any Version VerifiedFiles [PORTABLE]

Microsoft Office 2010 Activator [VerifiedFiles]3.70 MB. Is it worth the money? Anyone have any experience with it? I have never heard of or used it before today. 12. I've tried this one but it doesn't work either. The DVD drive just comes up empty. I've even used the.iso file from a verified file on another PC and they also don't work. But the problem is: When I delete the Microsoft Office 2010 Activator [VerifiedFiles].zip folder it leaves the same content in the folder. I have to reinstall the program again and again in order to delete the old content. It's like it has a persistence thing that doesn't delete properly. Now I have an activated version of Office 2010. I uploaded the Microsoft Office 2010 Activator [VerifiedFiles] to an external USB hard drive and I can see it's not corrupted because I can use that dvd drive and it works fine. My question is why? Can someone help me out? Im new so dont just post a bunch of links and leave me hanging. Thank you. A: The location of the activation key is: C:\ProgramData\Microsoft\Office (10.0|12.0|16.0|17.0|20.0) This location is protected by Microsoft to prevent malicious files (such as kmspirv.inf) from screwing with the keys used. Because it's impossible to know what versions of Office are installed on a user's system, it's impossible to give an exact answer as to how they are chosen. To get rid of the files, login into Windows as administrator and delete all files inside: C:\ProgramData\Microsoft\Office (10.0|12.0|16.0|17.0|20.0)\Activator\ Once deleted, launch the Office Activator from the C:\ProgramData\Microsoft\Office (10.0|12.0|16.0|17.0|20.0) folder.
