Features Key:

A WEG exclusive weapon. The AR-15 is a weapon system that has been modified by World of Guns over the years to provide you with a weapon that rivals the AR-15 that some from the elite forces have in service.

Unlike your typical AR-15 there are multiple styles of them - with different sights, sights of unique design, different styles of stocks that are compatible with unaugmented MRSS and you even have your AR-15 configured with a SOPMOD rail. You can see all the options further below!

Generally the mechanics are the same from the standard AR-15, (of course with a different outlook). The primary function of the AR is support without which nothing can be done. The weapon is suitable for a wide range of situations. From tight defilade situations to long sighted firefights for engaging opponents that are either out of the reach of your primary weapon or a pool that is not expected from them.

Currently the AR-15 can be configured with a Re-Aim, under arm stock and a M-LOK handguard that are suitable to be equipped with a number of modifiers.

Features:

- World of Guns made the AR-15 a simple weapon system with multiple styles and options to be configured with. This will allow you to make the AR as suitable as possible to the exact fit for your play-style.
- Several in-game videos illustrating the configuration options available to you, please check them out on www.worldofguns.com.

DLC key included! World of Guns: Assault Rifles Pack #2

World of Guns: Assault Rifles Pack #2 Game Key features:

- The M16 MOD 4 A3 is a configuration of the rifle from World of Guns DLC (available separately). It comes with the following changes:
 - A modular handguard configuration that allows you to modify the handguard to fit the AR-style weapons.
 - A side mounted rail system for attaching T.E.G S&W MP9 Red Dot with a speed booster, and the accessories.
- This

World Of Guns: Assault Rifles Pack 1 [March-2022]

What's new:

By KING-SIEW K. What's good gamers? Me. How are you doing? Great, thanks. I'd like to thank all you readers out there for sticking with me on this wild ride. There has been enough criticism aimed my way from all sides, so I need to embrace it, though I wouldn't be in the position I am today if you hadn't given me a shot. That said, I have two things to say as we begin World of Guns' "assault rifles pack" series. How long can I go with covering a simple tutorial on a rifle without you telling me to cease and desist? For example, the five categories this series on assault rifles aims to cover: Rock River Arms-Rock River Armory-Glock-

**Firearms International With about two years of experience covering rifles for the FW we're covering here today, I am constantly contemplating - 'How much longer can I keep this thing going before my readers cease to give a damn?' It's a big concept, yeah? If only I could explain in one sentence just how convoluted the 'conspiracy' is that has kept me from just getting together here, and having a 'normal' conversation about guns, I would probably get much farther. I would even have the need to set aside the fear of such a life changing event occurring and just tell you, I'm tiring of it. But hey, what's money got to do with it? I've been doing this a long time now, and there's only a finite amount of time and place to work anywhere, and even places I get better income at the cost of my brotherhood. So my thoughts are this - How much longer can I keep writing about simple concepts without you blanketing me with complaints? We're here to have an open dialogue, not for everyone to just soak up knowledge you're entitled to, and tell me to shut my yap. How's that for straight to the point? Yeah, I was getting off on that. *
* * * **A GUY GOES DOWN, HE'S GONNA NEED SOME HELP I will endeavor not to spend much time on any one****
